

BACTEND

CONCENTRATED ANTIBACTERIAL PURIFIER FOR WATER TANKS

DESCRIPTION

BACTEND is a concentrated purifier developed to reduce and prevent the proliferation of bacteria in water tanks.

BACTEND is a rapid acting Algaecide, Bactericide and Fungicide.

The biocidal efficacy of **BACTEND** depends on its capacity as a cationic surfactant to disrupt cellular and intracellular membranes. Functions such as cell adhesion, cell signaling, selective permeability to ions and nutritional organic molecules are primarily affected.

It destroys and eliminates unpleasant smells by attacking the fermented organic substances.

BACTEND does not affect the skin, the eyes and mucous membranes.

TECHNICAL DATA :

Physical form: liquid

pH value (5% Soln) :7 (±1)

Density (g/ml): 0.98 (± 0.02)

Solubility :Soluble in water in all proportions

Color : Colourless

Odor : Odorless

INSTRUCTIONS OF USE :

Recommended dilution is 10 ml for 70 litres of water.

It is advised for the storage of the water tank.

Usage : TP n°2

Chlorure de didécyl diméthyl ammonium (CAS 7173-51-5) 6,50 g/kg

**Ref. 457FL - Bottle 125ml
with measuring cap**

Shelf life : 3 years

Keep out of the reach of children. Reclose the packaging after each use.

Exposure to sun and extreme temperatures should be avoided. Keep out of direct sunlight.

Always carry out a test prior to use on the surface to be treated to determine suitability and the appropriate contact time. Before use, read the label safety section for Health and Safety Information or request the safety data sheet to servicetechnique@mattchem.fr.
