

BIOCHEM

ENZYMATIC ECOLOGICAL TREATMENT FOR BLACK WATERS

DESCRIPTION

BIOCHEM is a combination of :

- cleaning agents selected for their propensity to biodegrade and their easily renewable origin.
- bacteria and enzymes.

BIOCHEM ensures the ship's WC normal working by acting on 3 strategic functions:

- Liquefaction and reduction of the faeces and organic deposits.
- Neutralisation of the nauseous smells.
- Bacteriological sanitation ensuring a perfect hygiene.

BIOCHEM inhibits fermentative bacteria that produce smelly gases thanks to enzymes.

BIOCHEM is miscible in water in any proportion.

TECHNICAL DATA :

- Physical state : Liquid
- Density : 1020 g/l +/- 20g/l
- Colour : Cream
- Odour : Almond

INSTRUCTIONS OF USE :

Directly pour the product in the tank.

Bring the volume of water necessary to ensure a sufficient level allowing to cover the faeces.

For a tank from 50 litres: pour 150 ml.

For a tank from 100 litres: pour 300 ml.

WELL SHAKE THE PRODUCT BEFORE USE

Adding of BIOCHEM are to renew according to the frequency of use, the periodicity of tank's drainings, deposits, toilet paper, bad smells and ambient temperature.

Noted:

A rise of the ambient temperature may increase the proliferation of bad smells, it is then necessary to double the dose.

Ref. 549M - Bottle 1 litre
Ref. 549M.5 - Bottle 5 litres

Shelf life : 3 years

Keep out of the reach of children. Reclose the packaging after each use.
Exposure to sun and extreme temperatures should be avoided. Keep out of direct sunlight.
Always carry out a test prior to use on the surface to be treated to determine suitability and the appropriate contact time. Before use, read the label safety section for Health and Safety Information or request the safety data sheet to servicetechnique@mattchem.fr.
