

# YO-DE

## FLEXIBLE HOLDING TANK SEAL PREVENTING BAD ODOURS RISING

### DESCRIPTION

**YO-DE** is a blue flexible sealing layer resting on the surface, which helps reduce emission of bad odours from black liquor.

Several millimetres thick, **YO-DE** makes the waste contained in the "holding tank" black liquor reservoir completely airtight.

**YO-DE** is manufactured from components chosen for their biodegradability.

**YO-DE** is a stable and non-volatile product whose boiling point is considerably higher than water.

**YO-DE** is not classed as a marine pollutant according to the International Maritime Dangerous Goods (IMDG) Code.

**YO-DE** is neutral not altering metals or normal materials.

### TECHNICAL DATA :

. Physical state : Slightly viscous fluid

. Chemical reaction : Neutral.

. Density : 850 g/l + 20 g/l.

. Color : slightly blue.

. Viscosity brookfield : 130 Centipoises mobile 2,  
speed 100 rpm with 17°C

### INSTRUCTIONS OF USE :

Pour into the toilet and pump.

To work out how much product to use, calculate the surface area of your reservoir.

For 0.20m<sup>2</sup>, use 2 litres.

For example, for a 60 x 40 x 60 cm tank, i.e. a surface area of 0.24m<sup>2</sup>, 2.4 litres would be needed to attain a seal one centimetre thick.

Every time the tank is emptied, pour in the dose required to create a seal.

**Ref. 113M**  
**Bottle 2 litres**

Shelf life : 3 years

Keep out of the reach of children. Reclose the packaging after each use.

Exposure to sun and extreme temperatures should be avoided. Keep out of direct sunlight.

Always carry out a test prior to use on the surface to be treated to determine suitability and the appropriate contact time. Before use, read the label safety section for Health and Safety Information or request the safety data sheet to [servicetechnique@mattchem.fr](mailto:servicetechnique@mattchem.fr).
